

2400W DIODE LASER HAIR REMOVAL

AI HAIR ANALYZER

SMART ANDRIOD SCREEN

FOUR WAVELENGTHS

PERFECT PAINLESS HAIR REMOVAL

A TREATMENT THAT IS EFFECTIVE, FAST AND COMFORTABLE

Ice point offers the synergistic benefits of the 4 most effective wavelengths for hair removal, each targeting different structures within the hair follicle. The 4 main anatomical targets include the bulge, bulb and papilla. With an improved patient experience and a business-oriented approach, it can create a unique and result-driven new solution in the world of professional hair removal.

Decreased pain

Unique mechanism reduces pain during treatment.

Efficacy

Laser energy delivered more efficiently.

Treatment time

Rapid coverage rate without gel or anesthesia. Quickly and comfortably.

Safety

Lower fluence is required per pulse.

PRODUCT DISPLAY

90°

INTUITVEINTERFACE

Efficient Operation

Intelligent handle screen linkage allows for direct parameter adjustments via the touch screen on the handles, ensuring convenient and fast operation.

FOUR WAVELENGTHS

Allowing you to customize laser hair removal treatments for all skin types

755nm

755nm recommended for treating pale skins (phototypes I-III) with fine hair. Indicated for removing the residual hair of the last sessions. With more superficial penetration, the 755nm wavelength targets the Bulge of the hair follicle and is especially effective for superficially embedded hair in areas such as the eyebrows and upper lip.

808nm

808nm recommended for treating all skin phototypes particularly patients with a great density of hair and first sessions. Its deep penetration capabilities target the Bulge and Bulb of the hair follicle while moderate tissue depth penetration makes it ideal for treating the arms, legs, cheeks and beard.

940nm

940nm wavelength effectively penetrates deep and is absorbed by the target chromophore. The adequate pulse duration, energy density and epidermal cooling ensure sufficient thermal damage to the target tissue without damaging the surrounding tissue to achieve effective hair removal.

1064nm

1064nm indicated for treating dark phototypes (III to tanned, V and VI). The 1064nm offers the deepest penetration of the hair follicle, allowing it to target the Bulb and Papilla, as well as treat deeply embedded hair in areas such as the scalp, arm pits and pubic areas.

CUSTOMER FEEDBACK

 Jackie

“

The service has been outstanding from the very beginning.. I will continue to buy from this company. All my equipment was received in good condition and well packed. The company was always making sure of the delivery updates. Outstanding customer service outstanding delivery

”

“

I really LOVE this machine !! Merchant shipped very quickly, the treatment was perfect, my account manager David answered all my questions patiently. I am extremely satisfied with all the staff who assist is absolutely professional and has lots of patience, guide me everything I need , thank you!100 percent I trust this company my money is worth it

”

 Jessica

 Joe Hellier

“

This beauty device has an elegant design and operates smoothly. The interface is user-friendly with clearly labeled functions. Customer service was prompt and professional in answering all my questions. I'm extremely satisfied with the overall experience!

”

“

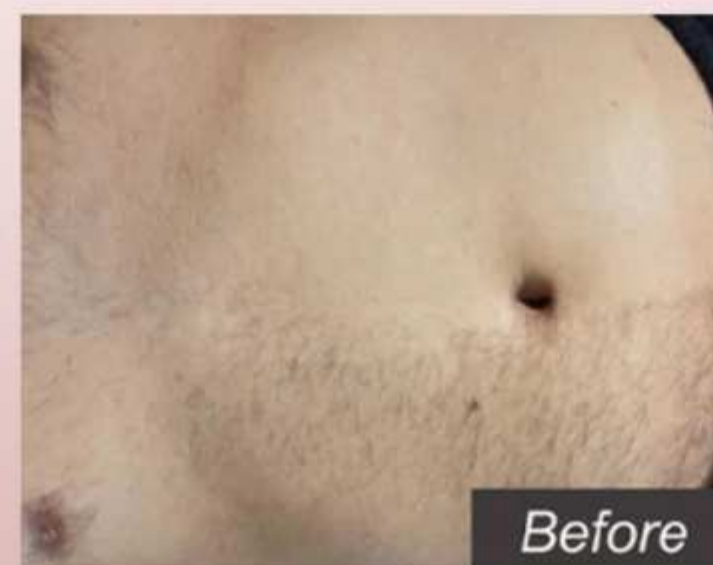

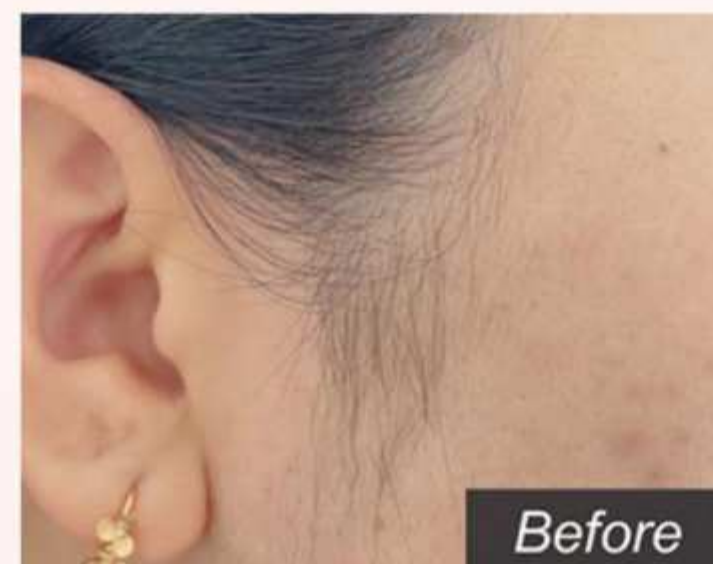

I've used the JR-Beauty Machine a few times so far and it works perfectly . My machines have been well-made and sturdy. They were packed securely in a padded metal case that was in pristine condition on arrival. which is why I continue working with them to find the machines and technology.They work hard to find the best and most cost effective solutions to get your orders to you.

”

Before and after

Product Parameters

Product name	Diode laser hair removal machine+skin analyzer
Laser type	808nm/808nm+755nm+1064nm+940nm optional
Function	Hair removal+skin analysis
Energy	1-140J/cm2
Frequency	1-10HZ adjustable
Laser power	800/1000/1200/1600/1800/2000W optional,OEM provide
Output power	3500W
Screen	15.6'' TFT color touch screen
System	8 languages option, OEM provide
Spot size	15mmx15mm/ 15mmx20mm/15mmx30mm/15mmx40mm optional, OEM provide
Cooling	Water+Air+Semiconductor+sapphire
Crystal temperature	0— -10℃
